from **44,64 EUR**

Item no.: 379696  
shipping weight: 0.60 kg  
Manufacturer: Feldherr

### Product Description

A fantastic organiser for a fantastic game set - All 40 plastic figures plus terrain pieces and game material neatly and safely stored in the original game box. Terrinot is on the brink of destruction and the rulers are too busy debating to protect the realm from the demonic hordes. So heroes are needed now more than ever. To ensure that Brynn, Galaden, Syrus, Vaerix, Chance and Kehli are ready for battle and can hold their own against monsters that still have all their claws and wings, you get the matching Feldherr foam set here to protect the detailed miniatures. To top off this fantastic game set, there is also a Feldherr organiser for the terrain pieces and for sorting the game material. - The set fits exactly into the original board game box of the "Descent: Legends of Darkness" base game from FFG. - It offers space for all 40 miniatures, the 47 terrain pieces and the complete game accessories of the base game. - Two foam inserts protect the miniatures. The inserts are placed in the original cardboard insert of the lower box. - The organiser made of robust plastic fills the upper box. It helps you to store and sort the playing cards, terrain pieces and small game accessories such as markers and dice. - The cards also fit with protective sleeves (max. outer dimensions 66 x 91 mm). - All terrain pieces (including the dragon) can be stored in the organiser when assembled. - Includes 4 card dividers to subdivide the playing cards. - The "Premium Health Dials" (Premium Life Wheels) can be stored in the corresponding compartment instead of the cardboard life wheels. - Larger game components - game board parts, documents, hero cards, building instructions, compendium and rulebook - are stored on the organiser. - Transport and tilt-proof - The box closes flush. Place the two Feldherr foam inserts in the cardboard insert of the lower box. Each miniature is individually supplied here. From the dwarf heroine Kehli to the Specter and the gigantic half-dragon Centurion, all hero and opponent models have a customised compartment. The custom-fit cut helps with sorting and also ensures that nothing slips around during transport. The intricate details of the miniatures are thus reliably protected from damage. If you have painted your models, you can be sure that the colours are still intact even after transport. There is one compartment free on each of the two foam inserts where you can store game material such as dice and markers. The organiser made of robust plastic takes care of the terrain pieces and the small game material. You place this in the top box. The enclosed instructions will help you with this. Have you already glued the terrain together? No problem, all terrain parts can of course remain assembled. The organiser ensures that the terrain pieces are clearly arranged in the box. It also protects the cardboard pieces from annoying creases and other damage. Three individually removable card holders including 4 card separators help you sort the playing cards. A token holder with 7 compartments offers enough space to organise your markers in a practical way. The plastic ID markers also have their own compartments and boxes, as do the dice and the wheels of life. This means that the game material is now also properly organised. This saves time when setting up the game and you and your companions can relax and set off on your adventure. There is still enough space on the organiser to store the larger game components. On top are the game instructions, the compendium and the building instructions, as well as the hero cards and documents. The game board components form the final section. The set consists of: - 2 foam inserts for enemy and hero miniatures (ASMFEF040BO + ASMFEE075BO) - 1 foam cover - 3 plastic card holders for playing cards - 1 plastic token holder for sorting the tokens - 1 plastic tray for the dice - 8 plastic trays for stowing the terrain components. The foam inserts have the following dimensions: - ASMFEE040BO: 247 mm x 247 mm x 40 mm total height (30 mm usable height + 10 mm foam base) - ASMFEE075BO: 247 mm x 247 mm x 75 mm total height (65 mm usable height + 10 mm foam base) - high-quality, fine-pored foam - chlorine-free and acid-free - Made in Germany. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted. - thermoplastic - no assembly required - ready to play - 3D printed in Germany
