Product Description

AUER Packaging's sturdy transport trolley makes transporting plastic containers particularly easy and safe. Thanks to its basic dimensions of 60x40 cm, it is perfectly suited to standard Euro containers up to 600 mm x 400 mm.- with parking brake- load capacity up to 250 kg- particularly smooth-running wheels- 4 swivel wheels- material: ABS- wheel material: rubber- colour: traffic red similar to RAL 3020- Ø wheels: 10 cm- load approx. 250 kg (approximate values, based on practical experience and parts of ISO 8611, based on evenly distributed loads at room temperature (20°C). Different operating conditions result in different values - we recommend testing the product before use.) Thanks to the transport trolley, heavy lugging is no longer an issue. The typical transport trolley has a basic size of 60x40 cm. It is therefore also suitable for transporting two closed Euro containers with external dimensions of 40x30 cm, for example. Thanks to four manoeuvrable castors, the items can not only be moved straight ahead, but also smoothly around corners.
