ORG118 - Organiser for Terraforming Mars - Basic Game Box

from **25,96 EUR**

Item no.: 379601
shipping weight: 0.10 kg
Manufacturer: Feldherr

Product Description

Off to Mars. Earth has become too small for humanity. We look longingly to the stars. Huge corporations are supposed to make our neighbouring planet habitable. In "Terraforming Mars", you take control of one of these corporations. Your goal is not just pure profit, no, you want to leave a huge footnote in history. So that you don't fail because of the mess in your basic game box, we have the matching Feldherr Organiser for you. It keeps your box tidy and helps you shape the future of humanity. The organiser fits into the original board game box of the "Terraforming Mars" base game. It offers space for all the game material of the base game and the expansions Prelude, Ares Expedition, Riot, Next Stop - Venus and Colonies. The original cardboard insert and the original card dividers are compatible with the organiser and can remain in the board game box. All components of the organiser are individually removable. All cards also fit with protective sleeves. If you want to travel to other planets, weight is a serious factor. To keep the box as light as possible, only the game components absolutely necessary for playing are stored in the basic game box. The instructions, player boards, trading fleet token, global events board, terraforming committee board and the game board are stored on the foam lid. The other large components are either stored separately in the expansion boxes or in the Feldherr storage box FSLB055BO (this is not included in the set). The box protrudes approx. 3 cm. transport and tip-proof - vertical storage possible - "Ready to Use" - no assembly required. The set offers space for all the game material from: Terraforming Mars - basic game - Terraforming Mars: Prelude - expansion - Terraforming Mars: Ares Expedition - Expansion - Terraforming Mars: Uproar - Expansion - Terraforming Mars: Next Stop - Venus - Expansion - Terraforming Mars: Colonies - Expansion. While you reach for the stars, we take control of your base game box. The eight token holders and four card holders ensure that your game material is always clearly organised in the box. This saves you time when setting up the game and means you always have the essential game components to hand. To start the game quickly, simply place the individually removable trays on the table and get started straight away. The set consists of: 4 plastic card holders, each with 3 compartments for playing cards such as corporation cards, project cards, overview cards - 4 plastic token holders, each with 6 compartments for markers and tokens such as dominance, gold, silver bronze and player markers, temperature, oxygen and generation markers, as well as ocean tiles, green area/city tiles and special tiles. - 1 token holder made of plastic, narrow, with 6 compartments for small game material such as neutral delegates and coloured delegates. - 1 plastic token holder with 1 compartment for colony tokens. - 2 plastic token holders, each with 2 compartments for tokens and markers such as starting player tokens and political tokens. - 1 foam lid. The organiser has the following external dimensions: 285 mm x 285 mm x 69 mm high. All cards fit into the card holders even with protective sleeves. The foam lid supplied ensures that nothing can fall out of the compartments. To keep the weight and protrusion of the box to a minimum, only the larger game components directly required for play are stored in the basic game box. The instructions, player boards, trading fleet tiles, global events board and terraforming committee board are stored separately on the foam lid. The large-format contents, such as additional player boards, game boards and instructions, can either be stored separately in the expansion boxes or collected in the Feldherr storage box FSLB055BO (not included in the set). - high-quality, fine-pored foam - chlorine-free and acid-free - Made in Germany. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted. - thermoplastic - no assembly required - ready to play - 3D printed in Germany
