All miniatures are distributed across two storage boxes with a total of 14 foam inserts, together with the entire game material, are excellently protected and clearly organised. One box is for storing the base game, the other offers enough space for the stretch goals of the Kickstarter campaign. From simple minions to giant bosses, from heroes to villains, from book cases to the Altar of Greed - every enemy model, every hero, every character and every terrain piece has its own customised compartment. Surrounded by soft, fine-pored foam, your figures are optimally protected during transport. You don't have to worry about scratches and chipped paint on your painted figures or broken parts of your miniatures. Individual inserts with special compartments for cards, card dividers, plastic rings, dice and tokens help you organise your game material. This saves you time when setting up the game and ensures that nothing stands in the way of a quick game. Of course, all playing cards also fit into the inserts with protective sleeves. Finally, three foam lids ensure that your figures are safely packed all around. You can store the rules, story guide and game boards separately in the storage boxes. The FSLB250 storage box is made of coated, double-wall cardboard and is therefore very light and also particularly stable. With the matching foam inserts, miniatures, game material and all other goods can be stored safely and protected from dust - and easily transported with the plastic carrying handle. One side of the box can be opened completely. This makes it easier to put away and remove the foam mats. The inserts are either inserted from the top or simply pushed into the side of the box.
