Product Description

Being an intergalactic exterminator is not easy. Especially when a hostile alien empire attacks humanity and brings it to the brink of annihilation. You join Project: Elite to stop the alien invasion by force of arms and show the extraterrestrial plague that you don't mess with super soldiers from Earth. With 144 miniatures, from iconic heroes and watch tower tokens to gigantic, multi-part boss enemies, Project: Elite has a lot to offer. And our complete set offers you enough storage space so that you can pack and transport everything perfectly. All miniatures and all game material from the following boxes can be stored with this set: - Project: Elite - Basic Game- Terrain Box Additional Content- Alienship Rescue Expansion- Alienship Rescue Extras- Deathmaw Valley Expansion- Deathmaw Valley Extras- R.O.O.K Team Expansion- R.O.O.K Team Extras- Alien Allies Pack Expansion- All unlocked Stretch Goals We have packed a total of 1 transport bag, 3 storage boxes, 14 foam inserts, 2 3D plastic token holders, 1 foam mat and 3 foam lids so that you can store all 144 miniatures and tokens, as well as all the game material, well protected and clearly organised. Glorious heroes, alien cannon fodder or gigantic boss opponents, like the metre-long Deathmaw. There is a separate, customised compartment for each model. In the case of Deathmaw, there are even 9. Your figures will always stay firmly in place, won't slide around during transport and are therefore optimally protected from damage. The soft, fine-pored foam reliably protects your elaborately painted miniatures from scratches and paint abrasion. Individual inserts with special compartments for cards, dice, tiles and tokens help you to keep your game material compactly organised and safe at all times. This means you always have an overview, save time when setting up the game and can concentrate fully on the important things in life: Creating, aiming, firing, collecting alien scalps. Because remember: Only a dead alien is a good alien. To prevent even the smallest cards from sliding around, we have added 2 plastic card holders to the set to fit the small playing cards. The trays fit perfectly into the large card compartments of the two HSMEQO50BO inserts. Of course, sleeved cards can also be stored there. Finally, the supplied foam lids ensure that everything is securely packed and nothing falls out when travelling. The rulebooks, campaign booklets and game boards are perfectly stored in the Feldherr storage box FSLB055. The box is made of coated, double-walled cardboard. This makes it not only pleasantly light, but also particularly tear-resistant and stable. This means that the play materials can be stored safely and protected from dust and transported easily thanks to the flat, compact shape. The FSLB250 and FSLB310 storage boxes are made of coated, double-wall cardboard and are therefore very light yet stable. The attachable lid reliably protects the contents from dust and other external influences. The two plastic-reinforced carrying handles on the sides make it easy to transport each box. You can pack all three boxes in the transporter bag made of lightweight but durable fabric and take them wherever you need them. In addition to the large main compartment, the bag also has a small side compartment. It can be lifted with two carrying handles or shouldered comfortably with the sturdy carrying strap.
