Whether large miniatures such as the AT-ST or small miniatures such as Storm Trooper and Han Solo - each miniature has its own painted compartment and is perfectly stored in our inserts made of fine-pored foam. The precise cut of the compartments prevents the precious models from sliding around and your painted models are safe from ugly scratches and chipping paint. Of course, the soft foam also reliably protects fragile parts from breaking off - Darth Vader retains his lightsaber, the blasters their barrels and the various figures their limbs. The set also has space for the numerous game materials - dice, cards, tokens and game board pieces. This means you won't get mixed up when setting up the game and have everything in view at all times. Of course, the cards also fit into the inserts with a protective cover. Finally, the supplied foam cover covers the inserts and prevents miniatures or game material from falling out during transport. Instructions and other game board components can be stored on the lid of the storage box or in the storage box on the foam lid. Of course, the inserts fit exactly into the sturdy double-size storage box. This is made of double-walled, coated cardboard and is therefore lightweight yet extremely hard-wearing. The attachable lid reliably protects your collection from dust and other external influences. Our transporter bag is made from lightweight but durable fabric. In addition to the large main compartment, the bag has a small side compartment. It can be lifted with two carrying handles or shouldered comfortably with the sturdy carrying strap.
