Product Description

The floor model is a replica of the F-22 Raptor. The F-22 Raptor represents the new air superiority fighter currently under construction for the US Air Force. It will eventually replace the F-15 Eagles, which have been in service since the late 1970s. The Raptor design uses the latest engine technologies to achieve supersonic speed without afterburners. It will also be equipped with sophisticated electronic equipment for weapons control. The weapons are carried in the fuselage to avoid radar detection and improve the aerodynamic characteristics of the aircraft.
