ORG172 - Organiser for Dinosaur World - Basic game box

from **25,96 EUR**

Item no.: 379376
 shipping weight: 0.30 kg
 Manufacturer: Feldherr

Product Description

Six films have already shown how difficult it is to open a park with cloned dinosaurs and send visitors back to the Jurassic era. Can you make sure that your park doesn't end in disaster and your visitors become dinosaur food? You have our full trust and support. With Feldherr Organiser as your competent partner, your park will be a success. Suitable for the original Dinosaur World base game box, this organiser keeps your game material neatly organised. As well as keeping the box tidy, it also helps you to keep an overview of the game table. You can see immediately if a dinosaur is missing or playing in the wrong tray. This allows you to react with suitable countermeasures and keep things running smoothly. - The organiser fits exactly into the original base game box of Dinosaur World by Pandasaurus. - The set consists of 12 plastic inserts and offers space for all cards, figures and the entire game material of the base game. - A suitable card holder is included for your playing cards. The cards can also be stored here with protective sleeves (max. outer dimensions: 91 x 72 mm). The dinosaurs can be sorted by colour in the trays. - The rulebook, Central Island Boards, Public Notice Board, Lab Boards, Park Boards and the DNA Dice Bag are placed on the foam lid. - Transport and tilt-proof - vertical storage. Transport and tip-proof - vertical storage possible. - Ready to use - no assembly required. While you maximise the turnover of your park, we make sure that your board game box stays tidy. Nine plastic trays for small game material, 1 card holder and two token holders ensure that your board game box is organised instead of chaotic. The cards and tokens have matching compartments, the figures are sorted by colour in the trays and you can sort most of the small game material according to your own ideas. Thanks to the clear layout, you can find the individual pieces quickly and save yourself the time-consuming pre-sorting before the game in future. To start the game quickly, take the individual trays out of the packaging and spread them out on the game table. After the game, place the game material in the corresponding trays and store them in the game box. This means everything is quickly tidied up and you are ready for a new round. Place the foam lid provided on the trays. This prevents the individual game components from escaping and falling out of their compartments during transport. The set consists of: - 4 plastic token holders, each with six compartments for small game components such as Excess Threat Tokens, Boredom Tokens, Excess Security Tokens, Excess VP Tokens, Jeeple Route Tokens, Jeeple Bonus Tokens, Objective Markers, Coin Tokens, Death Tokens - 1 plastic dice holder with six compartments for First Player Markers, DNA Dice, Danger Dice, Round Markers, Resource Markers, Jeeples + recess for Public/Private Action Cards and Round Summary/End Game Scoring Cards - 4 plastic figure holders, each with a compartment for plastic miniatures such as Workers, Herbivores, Small Carnivores, Large Carnivores - 1 card holder with two compartments for playing cards such as Worker Database Cards and Objective Cards - 2 tile holders with two compartments each for hexagonal tiles such as Attraction Tiles, Special Building Tiles, Welcome Centre/Park Entrance Tiles and Dino Paddock Tiles - 1 foam lid - high-quality, fine-pored foam - chlorine-free and acid-free - Made in Germany. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. All products are provided unpainted. - thermoplastic - made from renewable raw materials - no assembly required - ready to play - 3D printed in Germany
