Product Description

Welcome to the age of industrialisation. The age of coal and iron, technical achievements and social revolution. Welcome to the birth of capitalism. A time that changed everything. In "Brass", you are not only right in the middle of it all - in the grey cauldron of Birmingham or Lancashire, you are one of the motors and helmsmen of the industrial revolution. So that you can concentrate fully on expanding your network and flourishing your business, we take care of the organisation on the gaming table. - The organiser was specially designed for the Deluxe Editions of "Brass: Birmingham" and "Brass: Lancashire". - The original Deluxe Edition plastic tray is required to store the token holders in the game box. - The six token holders provide space for all tokens, markers, beer barrels and the coal and iron dice. - Playing cards, game aids and money chips (poker chips) are stored in the plastic tray. Player boards and game board are on top. - No assembly required. All parts are ready for immediate use. With this set you get the last bit of convenience that you were missing in the Deluxe Edition. Save yourself the time-consuming task of organising and arranging the markers, tokens and dice at the start of each game. With the Feldherr Token Boxes, they are now compactly stored and always where you need them. From the industry tokens to the coal and iron cubes to the character tokens - each item has its own compartment. This makes it easier for you to sort them after the game. Each entrepreneur also gets their own token holder. This provides each player with the personal markers and tokens they need during the game. At the start of the game, simply spread them out on the table. You have more time for the game and can concentrate fully on your business. With the organiser, you can always find what you need immediately and, thanks to the individually designed compartments, you can see straight away if a piece is missing. At the same time, this storage system reliably protects the game material against creases and other wear and tear. The plastic inserts are stored in the large compartment of the original plastic tray. The player token holders are placed on the token trays. 4 player token holders with sliding lid - Each of the four players gets their own tray. - Provides individual compartments for sorting the industry tokens, connection tokens, income and victory point markers. - The character token is placed in the round recess in the sliding lid so that each entrepreneur knows which tray belongs to them. 2 Token trays for the general game material - Each tray has two large compartments. - Provides space for the trader tokens, coal and iron cubes, as well as for the beer barrels and the cotton marker. The poker chips and the playing cards are still stored in the plastic tray. Finally, place the player boards and the game board on top, put the lid on and your game is packed. The set includes: - 4 plastic token holders with sliding lids for the players - 2 plastic token holders for the general game material - thermoplastic - no assembly required - ready to play - 3D printed in Germany. As with all 3D printed models, there may be minor imperfections. The product images are only examples of what the finished product may look like. All products are provided unpainted.
