00159 - Electronics construction kit

from **52,45 EUR**

Item no.: 384087
shipping weight: 0.80 kg
Manufacturer: eitech

Product Description

Immerse yourself in the fascinating world of physics with the electronics construction kit from eitech. Young researchers aged 8 and over can carry out their own physics experiments here. The child-friendly easy-click systems and precise construction plans make it possible to assemble an electric motor, construct alarm systems with relays and explore the wonders of the world of electricity step by step. With eitech, learning becomes an exciting adventure where discovery and fun go hand in hand. With 26 pages of detailed instructions for over 80 experiments. New robust connection technology means that different experiments can be set up in no time at all. Teaching the learning objectives:- How does electricity produce light, sound or movement?- How is an electric circuit constructed? Important information:- Age: 8+ years- Parts: 25- Difficulty: Advanced- 2 x AA batteries required
