Product Description

The quick game for the right word is now ... taboo! This is a version of Taboo, for adults only! In Taboo Uncensored, you also have to explain the search term to your team without using any of the taboo words yourself. (These are usually so taboo that we don't want to mention them here either.) How can you get your team to guess the word "aubergine" without using the words "purple", "vegetable", "grill", "emoji" or "shape"? This party game contains 240 cards with 480 search terms from the fields of pop culture, trends and probably some that are below the belt. In a race against time, players try to give well-chosen clues so that their team can guess the terms quickly. Whoever says the unpronounceable will be squeaked out by the opposing team and lose that point. Are you looking for a fun party game for adults?
