Product Description

The year is 1944, and the rumours that the Nazi army is successfully harnessing the mysterious energy of Vril to create devastating weapons, zombies and terrifyingly large mechs seem quite real. With the aim of putting a stop to this chaos, a crack team called the Reichbusters is sent to Wewelsburg Castle. To celebrate the Nazi extermination party in style, the "Reichbusters: Project Vril" Gung-Ho All-in-Pledge comes with a whole host of miniatures and accessories. To make sure your room doesn't end up in chaos and the Nazis get squashed on the tabletop, here's the matching Feldherr Transporter bag, filled with 3 storage boxes, the matching foam inserts and 2 token boxes to keep you safe and organised. The complete package offers space for all miniatures and the game material from: - the base game ("Heroic Pledge")- the "Not of this Earth!" expansion- the "Project X" expansion- and the "3D Doors" expansion. You can store all miniatures safely and neatly organised on a total of 13 foam inserts. The best way to see which compartments are suitable for which figures is to look at the pictures in the item description. You will also receive 2 assortment boxes and 2 storage boxes FSLB040 for sorting the game material. From the Allied heroes, the Nazi soldiers and other insidious enemies, to the house-sized aliens, the Vril tanks and the gigantic Project X - there is a suitable compartment for every miniature. Precisely fitting compartments ensure that your figures stay in place during transport and don't slide around. Surrounded by soft foam, the plastic models are optimally protected against damage. The tentacles and claws of the aliens remain intact here, as do the weapons of your heroes. If you paint your figures, you can also make sure that the colours are protected from scratches and abrasion. Individual inserts with special compartments for the cards, as well as two assortment boxes for small game material, such as dice, tokens and items, help you to keep track of the game material at all times. Alien items, wound tokens and action cards are therefore quickly to hand and the time and nerves you save on setting up the game can be invested in your missions instead. The two foam inserts for the cards naturally also offer enough space for cards with sleeves. You can sort your tokens, items, tags and all other small game material in the two assortment boxes supplied. The box has 5 elongated compartments. These can be further subdivided using the 12 dividers supplied. You can divide up to 17 compartments per box to store your game materials. Thanks to the transparent lid, you can keep an eye on everything even without opening the box. Larger accessories - map tiles, mission trackers, large 3D doors, room feature cards, dashboards and booklets - can be stored in the two flat storage boxes. This means that all miniatures are safely stored in their foam inserts in the large storage box. Tokens and other small parts are neatly stored in the two plastic assortment boxes. The token boxes fit into the transporter bag next to the box. And the tiles and other larger game material lie on top in the two FSLB040s. Thanks to the transporter bag, you remain flexible and can easily transport your Reichbusters collection to the next game at any time. The two flat storage boxes and the large DSLB310 for the foam are made of coated, double-walled cardboard. Our transporter is made of lightweight but durable fabric. In addition to the large main compartment, the bag has a small side compartment. It can be lifted with two carrying handles or comfortably shouldered with the sturdy carrying strap.
