### Product Description

In the far north, at the very edge of civilisation in Westeros, the Night's Watch tirelessly protect the Wall. Formed from the discarded men in society (the lesser sons, the criminals and the bastards), they train hard and are well equipped to face the many horrors. They will need this determination to protect Westeros. The A Song of Ice & Fire - Crossbowmen of the Builders unit box provides Night's Watch commanders with a specialised ranged unit for their forces. The crossbowmen are not very fast and lack heavy armour. Nevertheless, they are capable of dealing damage from a distance. Their regular attacks can easily pierce enemy armour, while their command allows them to make a free attack on any enemy that attacks them.
