00331 - Lorry with low loader

from **199,96 EUR**

Item no.: 384085
shipping weight: 3.50 kg
Manufacturer: eitech

Product Description

The eitech low loader is the solution for transporting large construction machines from site to site. Its power and dimensions are simply gigantic. It is perfect for transporting the eitech wheel loader. The lorry can be steered via an extension behind the cab. Details such as opening driver's and passenger doors, steering wheel, dashboard and indicated lighting make the playtime fun perfect. The low loader can be parked separately. The wheel spacers are ideal for transporting extra-wide construction machinery. Adjustable warning signs are included. The rear three-axle steering makes manoeuvring in tight bends child's play. To drive onto the low-loader, simply detach the front section from the trailer. The construction machine can then easily drive onto the trailer, just like its larger counterparts. The 00331 lorry with low loader metal construction set is supplied in a practical plastic case for storing the individual parts. Important details:- Age: 10+ years- Parts: 2180- Difficulty: Expert- Dimensions: 90.8 cm x 18.7 cm x 14.5 cm
