Product Description

Tales from the Loop - Starterset, (DE edition)

"As the robot thundered across the rye field towards the police bus, I realized that a border had been crossed, many hours earlier that day. Maybe when we got into the warehouse down in Satuna, where Olof had found this strange backpack. I should have noticed - when Olof put his hand into the large glove and the thing under the tarpaulin came to life. Or maybe it all started when we ran away from home before lunch? So much happens on summer days that it's hard to remember how one thing leads to another."

Simon Stålenhag is the internationally acclaimed artist and author of "Tales From the Loop" and "Things From the Flood", narrative illustrated books that stunned the world with the vision of an alternative Scandinavia of the 1980s and 90s in which technology penetrated calm landscapes and created a completely new universe of the uncanny and nostalgic.

Now you can immerse yourself in the amazing world of the loop! In this role-playing game based on the books by Simon Stålenhag, your teenagers are solving spectacular mysteries that are somehow related to the loop - just make sure you get home in time for dinner!

This starter set contains everything you need to start playing the game:

- an illustrated rulebook that explains how to play the game
- the complete mystery of "The Recycled Boy"
- five ready-made characters that you can slip into roles
- a large, full-color map of the area around the loop
- ten specially designed cubes

Attention! Not suitable for children under 36 months. - Game only available in German!
