Product Description

HeXXen 1733: Unter Wölfen, 128 pages (DE extension)

This Regionalia volume not only describes the city of Tübingen, but also takes a look at the werewolves who rule the province of Grauwarthe, to which Tübingen has belonged for several decades. The Regionalia band is divided into three parts. The first part describes the knowledge relevant for players and hunters about everyday life under the knuckle of werewolves. In the second part, the HeXXenmeister learns interesting facts about secrets and backgrounds, and also finds all NPC values ??for new monsters. The second part is also a small werewolf source volume. The third part consists of a bigger adventure "See and Die Tübingen". This sandbox adventure is about fast-paced action, but also about espionage and infiltration, which will present the hunters with new challenges.

Attention! Not suitable for children under 36 months.

- Language: German
- Number of pages: 128
