Product Description

DSA5 - Creature Document Set (DE Edition)

This creature document set offers two variants of fillable documents for animal and monstrous companions. On one sheet or two pages each, there is plenty of space for noting down characteristics, individual peculiarities, combat values, equipment and special abilities of creatures. One variant is tailored to animal companions and familiar animals, the other has been optimised for created and summoned creatures such as demons, chimeras, golems, undead, homunculi and more. An additional optional supplement for particularly complex companions, such as culture-creating chimeras, offers a detailed talent list on two pages, extra space for combat techniques and individual equipment.

The DSA5 Creature Documents Set contains:

- 10 copies of single-sided, full-colour, double-sided DinA4 deluxe creature sheets for animal companions and familiar animals, modelled on the DSA5 hero documents
 - 10 copies of single-sided, full-colour, double-sided deluxe DinA4 creature sheets for created beings such as chimeras, daimonids, golems, undead, ghosts and homunculi, modelled on the DSA5 hero documents. The document is also suitable for summoned creatures such as demons and elementals, but has been specially optimised for creatures that can be heavily modified by their creator
 - 10 copies of single-sided, full-colour, double-sided DinA4 optional sheets for the deluxe creature sheets, on which there is a complete talent list, combat technique list and plenty of space for worn equipment as well as a reference for hit zones
- Type: Creature Document Set
 - Language: German
