Product Description

Deadlands: The Weird West - SL Umbrella + Showdown in Sundown (DE Edition)

Something wicked is going on in Sundown! This beautiful US letter-size, three-piece game master umbrella is an indispensable tool at the gaming table. On the outside, a stunning image sets the players straight for adventures in the Eerie West, while the inside has a comprehensive selection of useful tables and information for the Marshal.

In addition, a 32-page adventure is included in this set: Showdown in Sundown

The town of Sundown is a town like many others on the frontier of the wilderness. It's a boomtown struggling to become a real part of civilisation. But if you look a little closer at Sundown, you'll notice something disturbing and darker in the shadows of the Wild West. Rumours have reached the Legion of Twilight, and your troop has been sent out to get to the bottom of it. The story is made up of equal parts.
