### Product Description

The German Lands - Regionalia for the hunter - extension for HeXXen 1733

In this 128-page book, selected cities of the Holy Roman Empire are described as well as larger areas of rule (e.g. Prussia and Kurhannover) and cursed regions (e.g. Markovia and Rabenschwarz). The player will find many suggestions here to develop a dazzling background for his hunter character, but also new possibilities to develop it further, be it as a knight of the Teutonic Order, as a schemer of the Baden oath of vengeance, as an imperial knight, Markovian frontier fighter or Prussian infantryman.

Warning! Not suitable for children under 36 months.
