from **18,55 EUR**

Item no.: 379408
 shipping weight: 0.20 kg
 Manufacturer: Feldherr

Product Description

It's the same game every year. Winter is approaching and the animals of Ahornthal compete to see who can build the best winter quarters in Ahornthal. Gathering new ideas and inspiration from outside is just as important as the right resource management. "The Animals of the Maple Valley" contains a variety of components. Keeping track of everything and building a winter-proof dwelling can be difficult. Luckily, we've got your back. Our design team has created this practical Feldherr organiser for your basic game box so that you don't overlook the forest due to unsorted game material. The plastic inserts keep the box tidy and prevent stone tokens from getting in the way and your consolation token consumption from increasing. The organiser fits exactly into the original base game box of "Die Tiere vom Ahornthal". The set consists of 13 plastic inserts and offers space for all the game material of the base game. A suitable card holder is included for each card size of the game. The different card types also fit into the card holders with protective sleeves (max. outer dimensions: Idea cards: 91 x 66 mm, Improvement cards: 74 x 74 mm, Traveller cards: 122 x 81 mm, Talk cards: 174 x 94 mm). Each player receives their own tray with the matching components in their colour. The trays can be removed individually. Place them on the game table and improve the overview and playing experience. Place the card holders for the talc cards, traveller cards and idea cards on the game board together with the shelter boards, the river wheel, hill and worm. Place the game board on top of the other stakes. The game instructions are placed at the top. Transport and tilt-proof - Vertical storage possible - Ready to use - No assembly required. While you realise your dream as an interior designer, we make sure that your game material is neatly stored in the board game box. Four token holders and four card holders made of high-quality plastic provide a suitable compartment for every token and every card. This means you don't have to search for individual pieces and time-consuming sorting is a thing of the past. To start the game quickly, take the individual inserts out of the box and spread them out on the table. Each player receives their own tray with the wooden figures and dice in their own colour. This means that you always have your personal game material in view and the rest of the game material is always to hand. After the game, you put the game materials in the trays and put them back in the box. Everything is tidied up in no time at all and you are ready for the next construction phase. The set consists of: - 1 plastic card holder with one compartment for very large playing cards such as talc cards - 1 plastic card holder with one compartment for oversized playing cards such as traveller cards - 1 plastic card holder with one compartment for square playing cards such as improvement cards - 1 plastic card holder with two compartments for standard cards such as idea cards - 2 plastic token holders with three compartments each for small game material such as goods markers (wood, stone, fruit, mushroom, wool and grain) - 2 plastic token holders with three compartments each for small game material such as goods markers (wood, stone, fruit, mushroom, wool and grain) - 2 plastic token holders with three compartments each for small game material such as goods markers (wood, stone, fruit, mushroom, wool and grain) - 1 plastic token holder with four compartments for small game material such as improvement tokens (wheelbarrow, almanac), coins, stories, etc. Consolation patches - 1 plastic token holder with two compartments for small game material such as multiple tokens (3x and 5x) - 5 plastic player trays with three compartments each for player-specific game material (sorted by colour) such as animals, houses and family dice As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. All products are provided unpainted. thermoplastic - made from renewable raw materials - no assembly required - ready to play - 3D printed in Germany
