Product Description

HeXXentanz, audio CD / audio book (DE) - extension for: HeXXen 1733

Once again composer Ralf Kurtstiefer takes us into the fantastic, creepy and action-packed world of HeXXen 1733. The tracks on this CD revolve around the witches of Europe and those who want to hunt them down. This soundtrack is as versatile as HeXXen-Europa. Flamenco sounds from Spain alternate with modern interpretations of classical works, accompanied by groovy electric guitars. Sometimes fairytale-like, sometimes rocking, sometimes heroic, sometimes atmospheric - a good mix that best describes the world of HeXXen 1733. The CD contains 21 pieces as well as two bonus tracks. Running time: approx. 69 minutes.

Warning! Not suitable for children under 36 months.
