### Product Description

HeXXen 1733 The Book of Rules, paperback (DE)

Welcome to Europe in 1733! Welcome to hell! 93 years have passed since a troop of careless mercenaries opened the door to hell in an abandoned monastery in the Black Forest. During this time, the face of the world has completely changed: vampires, witches, demons, werewolves and other beings have attacked humanity in order to fill it with fear and terror. Horror tales became a bitter reality: witches, werewolves and albums live in dark forests. In the important cities, vampires or demon cults hold the reins, determine politics and society. But 93 years after the catastrophe, a new breed of people has grown up, a generation with resistance in their blood. These people stand out from their fellow men; they are brave and spare no effort or danger to fight evil wherever they come across it in their travels. They carry the sword into the lair of the creatures of the night and fight with thundering muskets, holy zeal and the courage of real heroes against the sinister threat. In HeXXen 1733 the players slip into the roles of these courageous hunters. Accompanied by the acrid smoke of their pistols and muskets, they barricade themselves in shattered towers to face the never-ending waves of undead creatures. But they are also scholars: In the books of antiquity, the mysterious cuneiform script of the Sumerians and the hieroglyphs of ancient Egypt, they unearth hidden knowledge that promises help in the fight against hell.

The one bound in artificial leather Book of rules contains everything you need for the action-packed horror role-playing game in an alternative version of the European baroque. The players will find all the rules to quickly create a hunter character who, thanks to a flexible system of roles and powers, will always be unique. The game master receives all the rules he needs to stage an exciting, fast-paced and cinematic game, including a list of typical NPC powers and a number of powerful leader NPCs and their minions, who often appear in large numbers. For the game, we recommend using the HeXXenmeister box tools, which contain all the game materials necessary for visual staging at the gaming table.

Warning!Not suitable for children under 36 months.
