from **25,96 EUR**

Item no.: 379691
shipping weight: 0.20 kg
Manufacturer: Feldherr

Product Description

What do you do when you're standing on your feet in the air, on land, in the water and underground? When there's not enough space? Wipe other nations off the map, of course. To make sure this goes smoothly, there is a matching Feldherr Organiser for your basic game box. It allows you to easily organise the game material from the base game and five expansions. Your game material won't get mixed up. And search pauses won't interrupt the flow of the game. The organiser fits into the original Small World base game box. It offers space for all the game material from the base game and 5 expansions. Everything is always to hand. All 3D inserts are individually removable and can be distributed on the game table. The organiser replaces the original plastic inserts. These are no longer needed. Large-format game material, such as the instructions, rule reference, overview cards and the various game boards, are stored on the organiser. With the contents of all supported expansions and the basic game, the lid of the basic game box protrudes approx. 4 cm. If you only use the instructions and the game board of the basic game, the lid closes flush. Transport and tilt-proof - vertical storage possible. "Ready to Use" - No assembly required. The organiser offers space for all the game material from: Small World: Basic Game- Small World: Power Pack 1- Small World: Power Pack 2- Small World: Underground- Small World: Sky Islands- Small World: River World. We have taken control of your basic game box so that you can drive the other races off the map. 7 plastic token holders help you to neatly organise the mountains of tiles, tokens and markers. Each type has its own compartment. This prevents the game material from getting mixed up. This means you don't have to search for the right tile for long during the game and the flow of the game is maintained. Thanks to the clear structure of the organiser, there is no need for tedious pre-sorting. To start the game quickly, remove the inserts from the box and spread them out on the table. Once everything is ready to hand, you can get started. After the game, sort the tokens back into the token holders and place them in the base game box. The set consists of: 4 plastic token holders, each with 15 compartments for race tokens, "sunken tribe" tokens, turn markers, dice, lightning tokens, fireball tokens, copycat tokens- 1 plastic token holder with 8 compartments for race banners, blank banners, special ability tokens, blank badge + larger tokens such as camps, mountains, volcanoes, caves, fortresses, troll caves- 1 plastic token holder with 5 compartments for victory coins- 1 plastic token holder with 7 compartments for different sized tokens such as silver hammers, loot tokens, popular locations, respectable antiquities, mushroom shields, vengeful tokens, zeppelin, catapult, event tokens. Large-format game materials such as the instructions, rule reference, overview cards and the various game boards are stored on the organiser. With the contents of all supported expansions and the basic game, the lid of the basic game box protrudes approx. 4 cm. The lid closes flush when only the instructions and the game board of the basic game are transported together with the other game contents. You can store the game boards of the expansions in the original board game boxes. As with all 3D-printed models, there may be minor imperfections. The product images are only examples of what the finished product may look like. All products are provided unpainted. - thermoplastic- made from renewable raw materials- no assembly required - ready to play- 3D printed in Germany
