from **8,15 EUR**

Item no.: 379459  
shipping weight: 0.20 kg  
Manufacturer: Feldherr

### Product Description

Will "M" or the head of the IMF also have to deal with such problems? In Codenames, you don't know who is friend, foe or the "last thing you see". It's not easy to make the right choice between all the game material and under time pressure. To make it as easy as possible for you to contact your agents, we have commissioned the "Q"s in our service to develop state-of-the-art sorting and storage technology. The result is this fantastic Feldherr organiser made of robust plastic. Here you can store your game material clearly and compactly in the original board game box. The only thing missing is the rocket engine, right? - The organiser offers space for all the contents of the "Codenames" base game. - The set fits into the original "Codenames" board game box. - A card holder and an hourglass holder help you to sort the game material. - The word cards also fit with protective sleeves. (Max. outer dimensions: 73 mm x 52 mm) - The game instructions are stored on the plastic insert. - Transport and tilt-proof - vertical storage possible - "Ready to Use" - no assembly required While you train your knowledge of human nature and your memory, we ensure that your board game box is properly organised and structured. The card and hourglass holders help you to organise your game material clearly and neatly. Time-consuming pre-sorting is a thing of the past. Thanks to state-of-the-art technology and the clear structure of the organiser, today's agent has quick access to the required game material. This gives them more time to unmask double agents and find the button for the rocket engine. The set consists of: - 1 plastic hourglass holder - 1 plastic card holder for word cards, code cards, agent cards, plastic standee The agent cards can be sorted by type. So you always have the right agent to hand. Or an unsuspecting passer-by. The word cards also fit into the card slots with a protective cover (max. outer dimensions 73 mm x 52 mm). If you store the cards without the protective cover, you can also use the free compartments of the card holder as a storage compartment. A square compartment is available for your code cards, with the plastic stand hidden underneath. As with all 3D-printed models, there may be minor imperfections. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted. - thermoplastic - no assembly required - ready to play - 3D printed in Germany
