from **28,51 EUR**

Item no.: 379684
shipping weight: 0.30 kg
Manufacturer: Feldherr

Product Description

With the Feldherr organiser incl. foam insert, you can store all 6 plastic figures plus game material and terrain pieces neatly and safely in the original game box. Hadoken! The warriors around Ryu and Ken have been thrilling the video game community for decades. Now the iconic characters are venturing onto the game board and fighting for the title with cards and dice. "Street Fighter: The Miniatures Game" impresses with 6 highly detailed figures. Completely painted, with dynamic poses, the miniatures look simply stunning. But the figures are also very fragile. Limbs can break off and scratches can spoil the painting of the figures. We have this Feldherr organiser set to go with the game. Soft foam protects your miniatures and token and card holders help you to organise your game material. - The set fits exactly into the original board game box of the "Street Fighter: The Miniatures Game" base game. - It offers space for the 6 miniatures and the complete game accessories of the base game. - A foam insert with 8 compartments protects the miniatures. - Four plastic card holders provide space for the miniatures. Four plastic card holders are available for the cards of the fighter-specific battle decks. - The cards also fit with premium protective sleeves (max. outer dimensions 75 x 94 mm). - Small game materials such as tokens, dice and player boards can be neatly stored in the five plastic token holders. - All plastic components of the organiser can be removed individually. - Only the missile racks can be stored assembled. The remaining terrain parts are stored unassembled. - Alternatively, two more miniatures and the corresponding battle decks fit into the set. The terrain pieces would have to be rearranged for this. - You can store the rulebook and the game board separately in the box. - The lid of the board game box protrudes approx. 1 cm. - Transport and tilt-proof - vertical storage possible. - "Ready to Use" - no assembly required. While you are fighting on the street, we take care of the safety of your miniatures and the order in your box. The plastic token and card holders allow you to neatly organise terrain pieces, cards and small game material, while the Feldherr foam insert protects your miniatures from damage. As there is no need for time-consuming pre-sorting, you can use the time saved to improve your combat techniques and be ready for battle more quickly. Simply spread the trays out on the table and the gong can sound: Round 1... FIGHT! The set consists of: - 1 foam tray with 8 compartments for Streetfighter miniatures and assembled Missile Racks (GYMFET075BO) - 1 foam lid - 4 plastic card holders for playing cards (Battle Decks) and terrain pieces (Rocks, Boombox, Small Crates, Large Crates) - 5 plastic token holders for terrain pieces (Sakura Trees, Lanterns), player boards and small game material (dice, power-up tokens, turn order tokens, tag team tokens, continue tokens, guard tokens) You don't need to worry about protecting your miniatures. We have packed a Feldherr foam insert with eight large compartments in the box. Whether Ryu or Ken, each of the six iconic Street Fighter figures has its own compartment in the insert. Wrapped in soft, fine-pored foam, your figures are optimally protected during transport. The foam prevents scratches and chipped paint on your painted figures just as reliably as broken details. 2 compartments remain free in which you can safely store the assembled missile racks. You can store the rest of your terrain in the token and card holders. The terrain must not be assembled. Four card holders, each with 2 compartments, help you to neatly organise the battle decks from the base game. The cards also fit into the card holders with premium sleeves (max. outer dimensions 75 x 94 mm). You can use the five token holders not only for terrain, but also to organise small game material such as tokens, player boards and the dice. Once you have stored your game material neatly and the figures safely, place the game board and the rulebook on the organiser. Alternatively, two more Street Fighter miniatures and the corresponding battle decks from the various expansion packs can be stored in the set. In this case, you would have to store the Missile Racks disassembled on the game board and the rulebook to make room in the foam insert. The terrain pieces that you have stored in the card holder would also have to be moved to the game board and rulebook. The foam insert measures: 310 mm x 240 mm x 75 mm total height (65 mm usable height + 10 mm foam base) - high-quality, fine-pored foam-chlorine-free and acid-free - Made in Germany As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted. - thermoplastic - no assembly required - ready to play - 3D printed in Germany
