from **8,91 EUR**

Item no.: 379428  
shipping weight: 0.20 kg  
Manufacturer: Feldherr

### Product Description

If you think there are only trees and moss to admire in the forest, Everdell will prove you wrong. Hidden deep in the forest, you drive the forest dwellers to create impressive city-building projects. To make sure you don't lose track of your resources, we support you with the matching Feldherr organiser set. Customised token holders keep your game material tidy and prevent chaos in your box. - The organiser fits into the original board game box and offers space for all of Everdell's game material. - The set consists of 3 individually removable plastic token holders and a foam cover. - The original plastic insert from the basic game is required to store the token holders in the game box. - All cards also fit with protective sleeves. All cards also fit with protective sleeves (max. outer dimensions 94 mm x 67 mm). - Place the parts of the evergreen tree, the rulebook and the game board on the foam lid. - Transport and tilt-proof - vertical storage possible - "Ready to Use" - no assembly required Proper resource management and structured work are essential for building projects of any kind. We take care of the organisation in your box so that you don't overlook your city because of all the markers. The token holders in the organiser set complement the plastic insert supplied. Tiles, markers (points and occupied markers), resources (berries, resin, etc.), worker figures and the game cube each have a suitable compartment. This saves you time-consuming pre-sorting and allows you to invest the time you save directly in your building projects. To play, simply take the token holders out of the box and place them on the table. This means you always have your game material in view and can access it quickly. You sort your playing cards into the compartments provided in the original plastic insert. All cards fit into the compartments even with protective sleeves. The supplied foam lid prevents your game material from falling out of the token holders. Placed on the plastic insert, it makes the box safe to transport and tip over. This means you can also place it upright on a shelf and the tokens remain in their compartments. Place the pieces of the ever tree, the rulebook and the game board on the foam lid. - High-quality, fine-pored foam - Chlorine-free and acid-free - Made in Germany As with all 3D-printed models, there may be minor imperfections. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted. - thermoplastic - no assembly required - ready to play - 3D printed in Germany
