Product Description

The world has gone to the dogs and every day you fight your way through the desolate wasteland of the post-apocalypse. You don't want to meet a contemporary who is above you in the food chain. In Maximum Apocalypse, you take on the role of a survivor of the apocalypse and try to survive as long as possible. In addition to playing skill, this requires well-stocked game material. Naturally, we provide you with everything you need to ensure your survival for as long as possible. With this Feldherr organiser, you can store your game material compactly and clearly. So you don't have to worry about lost tokens and bent cards. - The organiser fits into the original board game box of the base game for "Maximum Apocalypse". - It offers space for all playing cards, tokens and the entire game material from the base game. All components of the organiser are made of sturdy plastic and can be removed individually. - All cards also fit with a protective cover. All cards also fit with protective cover. - Scavenge board and instructions are placed on the trays. - "Ready to use". No assembly required. All parts are ready for immediate use. - Transport and tilt-proof. Vertical storage possible. - Alternative sorting possible. With cards without a protective cover, the token holders are stored differently. If you are already struggling with the dreary existence as a survivor in the wasteland, then we will take over the organisation of your box. However chaotic it may be out there, your board game box will impress with its two token holders with neatly organised game material. Time-consuming pre-sorting is a thing of the past and you can put the time gained into the game. For a quick game set-up, place the two token holders on the game table. This means you always have everything to hand and can start playing with your friends straight away. The set consists of: - 1 token holder with 7 compartments for map tiles and hit point tokens. - 1 token holder with 8 compartments for map tiles, card dividers, poison tokens, objective tokens, monster tokens, ammo tokens, fuel tokens, standees, plastic stands, main dice and hunger dice. Place the cards with protective sleeves on the bottom of the base game box. Each token, dice and all the game material can be stored in the token holders. Store the token holders compactly on top of the cards. Store the scavenge board and instructions on the trays. Alternatively, you can also place the token holders next to the cards in the box if you are storing them without protective sleeves. The scavenge board and instructions would be placed on the trays and cards. With the alternative sorting, tokens can fall out of the organiser's compartments when stored vertically. The organiser has the following dimensions: 286 mm long x 196 mm wide x 31 mm high. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. Colours may vary. All products are supplied unpainted. - thermoplastic- no assembly required - ready to play- 3D printed in Germany
