### Product Description

Item no.: 300056018 Designation: 1:16 RC Panzer Königstiger Full Option Production of the Königstiger began in 1944 as the Second World War was drawing to a close. Equipped with the "Henschel" type turret with an 88 mm gun and thick armour, the Königstiger was a feared tank for the Allied forces. The accurately reproduced 1:16 scale kit shows all the details perfectly and is fully functional. Thanks to two motors, the tank can turn on the spot and the turret rotation and the alignment of the gun barrel can also be controlled remotely. The sound of the engine was recorded on the world's only fully functional King Tiger in the Armour Museum in Saumur/France. This is equipped with a powerful Maybach V-12 700 hp engine. Tank kit with MF-01 multifunctional unit (for sound and light effects), DMD control unit T-03 (sensitive control), instructions, 2x 380 traction motors, torsion bar suspension, aluminium hull, die-cast swing arms, hinged undercarriage with metal rollers. Warnings: Before you start assembling, you should have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Caution! Not suitable for children under 14 years of age.
