from **295,90 EUR**

Item no.: 390568
shipping weight: 1.50 kg
Manufacturer: TAMIYA

Product Description

Item no.: 300058719 Designation: 1:10 RC BBX 2WD Buggy BB-01 The BBX is a newly developed chassis and builds a bridge between the Tamiya classics such as Egress or Astute but reinterpreted in the modern age. The model has a 2WD drive with rear motor, which gives the model very good traction. This performance buggy is equipped with CVA oil pressure shock absorbers, TA-06 differential, double wishbones at the front and a long A-shaped wishbone system on the rear axle. The design is based on the original vehicles from desert races or UTVs. A tubular trellis frame forms the monocoque chassis and a cage for the driver is also modelled. The TAMIYA BBX is visually rounded off with a driver figure and a vintage decal sheet design. Required accessories Remote control with receiver, steering servo, 7.2V NiMH battery pack, electronic speed controller, motor, charger, paint for polycarbonate body (TAMIYA PS-) Contents 2WD kit model, BB-01 chassis, polycarbonate body with driver figure, Aluminium oil pressure dampers, ball differential (54306), monocoque chassis, ball bearings, 12mm hexagonal wheel hub, grippy grooved and studded tyres, chrome-plated rims bed-lock style, instructions ATTENTION! You should have read and understood all instructions before starting assembly. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Product details- 1/10 scale kit model- length: 414mm, width: 136mm, height: 233mm, wheelbase: 283mm- the modern/classic body design is by Atsushi Arino and is 3-sectioned to give a realistic look- new 2WD BB-01 chassis is based on a one-piece monocoque frame with a cage design- double wishbone suspension on the front and rear axle- double wishbone suspension on the front axle and long A-shaped rear wishbones inspired by UTVs- 2WD with rear engine provides good traction- CVA oil pressure shock absorbers for super off-road damping- TA-06 rear differential- incl. ball bearings and universal drive unit ball bearings and universal drive shafts included- rear cage can be removed by loosening a few screws- new chrome-plated beadlock wheels with large tyres- driver figure and light inserts included
