shipping weight: 0.40 kg
Manufacturer: TAMIYA

Product Description

Item no.: 300060304 Item no.: 1:32 Mc Donnell DOUGLAS F-15 EAGL The stand model is a replica of the McDonnell Douglas F-15C Eagle. McDonnell Douglas was awarded the contract to develop the F-15 Eagle jet fighter in December 1969. The Eagle's advanced aerodynamic design significantly reduced drag in both low and high lift configurations and achieved superior manoeuvrability in a variety of flight conditions. In 1979, an improved version of the Eagle was introduced as the F-15C. A notable change was the increase in fuel capacity, but even more fuel was made possible by the conformal fuel tanks located between the wings and pressed against the jet intake ramps. Kit model, scale 1:32, instructions, figure, decals, movable nose and access hatches, wingspan 408 mm, length 605 mm. Caution! Not suitable for children under 14 years of age. Product details- Detailed model kit in 1:32 scale- The high-quality kit from TAMIYA must be assembled by the customer.- The model is self-assembly with the aid of a self-assembly guide. The self-assembly is accompanied by step-by-step and illustrated assembly instructions. The assembly instructions are of course included in the scope of delivery.- Based on the assembly instructions, the precisely fitting individual parts must be assembled. The parts can be painted according to own ideas.- Tools, glue and paint are not included with the plastic kit. These must be purchased as an option.
