Product Description

The Honda CX500 Turbo was the world's first commercially available motorbike with a turbocharger, which was presented at the Cologne Show in 1980. Equipped with a water-cooled V-twin engine and a turbo unit developed jointly with Ishikawajima-Harima Heavy Industries. The combination produced 82 hp, and although it had 500 cc, it had the same power as a 1-litre motorbike. The front suspension was equipped with an anti-nose-dive mechanism, and the rear suspension was fitted with Pro-Link suspension. Large front fairing with square light this provides a beautiful atmosphere. The Honda CX500 is a motorbike that will go down in motorbike history in terms of both style and performance. Kit model, scale 1:12, road version, engine, frame, fairing, main stand, road tyres, exhaust system, instructions, decals, length 180mm. Caution! Not suitable for children under 3 years. Choking hazard due to small parts. Product details- Detailed model kit in 1:12 scale.- The high-quality kit from Tamiya must be assembled by the customer.- The independent assembly is accompanied by step-by-step and illustrated assembly instructions. The assembly instructions are of course included in the scope of delivery.- Based on the assembly instructions, the precisely fitting individual parts must be assembled. The parts can be painted according to your own ideas.- Tools, glue and paint are not included with the plastic kit. These must be purchased as an option.
