from **22,57 EUR**

Item no.: 390424
 shipping weight: 0.10 kg
 Manufacturer: TAMIYA

Product Description

Item no.: 510072009 Designation: 1:72 scale model set F-16 C/D Night Falcon Since the late 1970s, the F-16 Fighting Falcon produced by the American company General Dynamics has been a true icon of military aviation. Originally developed in response to the U.S. Air Force's need for a modern and efficient single-seat day fighter, the project evolved into an all-weather, multi-role combat aircraft with exceptional operational flexibility. The F-16 is characterised by the original, bubble-shaped cockpit canopy, which provides the pilot with exceptional all-round visibility. The F-16 has also been equipped with innovative solutions such as the lateral control stick, fly-by-wire and modern avionics systems for flight and combat. Appreciated by pilots for its optimal manoeuvrability and reliability, it is armed with an M61 20 mm Vulcan cannon. Thanks to various attachment points, it can carry a wide range of missile and bomb armament. The F-16 has been used by countless air forces around the world and has carried out a significant number of missions, often with great efficiency. Detailed plastic kit
