**COBI-5755 - 784 PCS HC WW II /5755/ WACO CG - 4 D-DAY**

from **41,00 EUR**

Item no.: 390729  
 shipping weight: 0.70 kg  
 Manufacturer: COBI

**Product Description**

The model was released in a collection prepared for the 80th anniversary of the Allied landings in Normandy and is marked with the official logo of the organisers of the anniversary celebrations. The WACO CG-4 was used by Allied forces to transport troops, supplies and equipment to battlefields. The glider could transport up to 13 soldiers or a corresponding load of combat equipment (Willys MB wagon). Its construction was based on a canvas-covered wood and metal frame. The glider had distinctive wings with a wingspan of about 83 feet (about 25 metres) and was towed by cargo planes such as the C-47 Dakota. It played its part in key battles such as Operation Market Garden and the Normandy invasion, enabling the rapid and effective movement of troops into enemy territory. Its participation in landing operations contributed to the success of the Allied forces and influenced the development of landing technologies after the war. The 1:48 scale model made of clamping bricks includes a new brick - the nose of the glider, which looks just like the real thing! Inside you can place the figure of the American pilot included in the set. The model has high-quality prints and is the same size as the published set with the Douglas C-47 Skytrain Dakota aeroplane. Together, the two sets form an extraordinary aerial duo in the style of D-Day! Will the Dakota also pull the WACO CG-4 in your neighbourhood? Build history, brick by brick! - 784 high quality elements - manufactured in the EU by a company with over 20 years of tradition, - meet the safety standards for children's products, - fully compatible with clamp building bricks from other brands, - building bricks with imprints do not deform or fade during play or under the influence of temperature, - glider model, - 1 figure - glider, Model dimensions (L x H): 31 cm (12.2 inches) x 9.5 cm (3.7 inches)
