Product Description

Stargazer 201 gives you a glimpse into the scarlet and magenta-coloured depths of the Crab Nebula in the constellation Taurus. Embark on an exciting cosmic adventure with the new Bicycle Stargazer deck 201. The backs of the cards feature images of the Crab Nebula in the constellation Taurus taken by the Hubble telescope on 19 September 2002 - giving you a glimpse into the scarlet and magenta depths of this fascinating supernova remnant. The picture cards with beautiful star constellations and the packaging finished with silver foil invite you into a universe of entertainment.
