This set brings the precision and technical know-how of air defence directly into your home. With a scale of 1:144 and an impressive 223 parts, this kit is a must-have for any detail-oriented modeller. The dimensions of the finished model and the age recommendation of 12+ years make it the ideal project for young and adult modelling enthusiasts. This Level 4 kit will challenge your skills and provide an in-depth and rewarding building experience. Included: - 223 precision-crafted parts- Detailed assembly instructions- Special glue for a durable bond- High-quality decals for realistic markings- Additional special parts for advanced modifications- The Air Defender stands out with its realistic design and highly detailed parts. - Innovative building techniques and the ability to customise offer a unique building experience. The special edition of this model kit honours the significant - - NATO exercise of 2023, in which the A400M and Tornado played a central role. The Air Defender is ideal for advanced level 4 modellers. Experience in gluing and painting is recommended to fully exploit the potential of this set. It is the perfect set for those who are looking for a challenge and want to develop their modelling skills. Background information: In June 2023, 25 NATO member states gathered over Europe for the largest air operations exercise in NATO's history, initiated by the Bundeswehr. Over 10,000 soldiers and 250 aircraft, including 23 different types of aircraft, took part in this historic manoeuvre. The Air Defender model kit pays tribute to the A400M and Tornado aircraft that played a key role in this exercise and invites modellers to become part of this fascinating history.
