Product Description

Assemble the Emperor Scorpion to unleash a mechanised predator that will mercilessly hunt down your enemies on the battlefield. ROKR Emperor Scorpion Model DIY 3D Puzzle MI04. Awaken the ferocious Emperor Scorpion and lead your comrades to victory. His enemies will tremble in fear at his highly mechanised transformation. While this war machine retains its classically shaped left pincer, its right pincer has evolved into a three-clawed power arm with a strong core that allows it to use different rotation modes to tear its enemies to shreds. The blue light on its tail allows it to sting its enemies with amazing precision, while the green light indicates the tail's deadly neurotoxins that can kill its prey with one hit. The Rokr Emperor Scorpion model is a DIY 3D puzzle made from ABS polymer, metal and leather for steampunk aesthetics. With a medium level of difficulty, it's a great project for teens and adults looking for a cool design and straightforward assembly. Once finished, it can be displayed on an industrial-style base in all its retro-futuristic glory. - Total pieces: 123 parts- Plastic parts: 67 pieces- Difficulty level: ??????- Assembly time: approx. 4h- Age: 8+- Package size: 274*188*90mm- Assembly size: 170*130*115mm*Note: Due to customs regulations, the batteries (3 pieces AAA/LR03/AM4 1.5V) may not be included in the package.
