### Product Description

Product description Return to the roots: 1953 Corvette Roadster - Highly detailed model kit in 1:24 scale! Fulfil your passion for classic cars with our faithful 1953 Corvette Roadster model kit in 1:24 scale! This high-quality plastic kit features 91 parts to create a stunning replica of the very first Corvette produced 70 years ago. With a length of 177 mm and recommended for ages 12 and up, this kit is perfect for all ages who want to improve their modelling skills. Scope of delivery Our comprehensive kit contains all the necessary parts and accessories to faithfully recreate the 1953 Corvette Roadster. Discover the fascination in the detail with separate, movable bonnet and multi-part six-cylinder engine. The included chrome parts such as wheel rims, windscreen, bumpers and radiator grille give the model the authentic glamour of times gone by. The kit also includes illustrated, multilingual building instructions and decals to personalise the model. Our model kit is aimed at car enthusiasts and modelling fans alike. The detailed steps in the instructions make it suitable for beginners, while experienced modellers will appreciate the challenge and accuracy. This model is perfect for exhibitions, collections or as an impressive decorative piece. It will also provide hours of fun for players who enjoy assembling it. Our model kit is characterised by its exceptional attention to detail. With innovative building techniques and painted parts, you get a realistic end product. The high quality and high degree of authenticity make this kit a coveted collector's item. In addition, special editions or official licences are available to expand your collection. Background information Immerse yourself in the fascinating history of the original model - the 1953 Corvette Roadster, which was produced 70 years ago and launched the legendary Corvette series. Learn about the innovative construction and unique design that made this icon a timeless classic. With our model kit, you can now create and admire a piece of automotive history yourself.
