Product Description

EXIT puzzle: In the dragon laboratory, 759 pieces, ages 14+

Exit rooms are the live game trend and have long been a source of enthusiasm around the world. The idea: Several players can be locked in a room to complete a mission. To do this, they have to solve puzzles that are hidden in the room. This game principle forms the basis for a completely new variant of the puzzle: the EXIT PUZZLE. If all 759 parts are in their place, talent for combination, imagination and intuition are required! Just like the live gamers in the Exit Rooms, the Exit Puzzlers also immerse themselves in an exciting story that takes them into mysterious worlds. But you can only become a hero of history if you - piece by piece - crack the last big puzzle and thus find your exit.

You have been passionate about dragons since you were a child. That's why you're overwhelmed when you see the research laboratory of your great-uncle - a famous dragonologist - with your own eyes. However, there is no trace of himself. But he has left an ominous note: an ancient, magical artifact that he stole from a temple in Guatemala is threatening to destroy him! Suddenly you hear a hiss and seconds later you look into the eyes of a dragon - a truly living, scaled monster! The guardian of the stolen artifact has arrived! Where is it and can you deactivate its spell in time?

Warning! Not suitable for children under 36 months.

- Player: For 1 player, ages 14+
- Number of parts: 759
- Puzzle size: 70 x 50 cm
