Product Description

The great adventure, fame and immeasurable wealth - all this awaits the Black Hole Buccaneers. In the connoisseur game, it is the players' task to collect ancient collectibles from the orbit of black holes, which were dumped there hundreds of years ago as humanity's waste for final disposal. For example, among the 99 cards there are artefacts and relics that have powerful effects, as well as toys that are not particularly valuable in the year 2642, but are in great demand by other species. In exchange, these offer their help to escape black holes, into which the players are drawn when the collected space debris exceeds the threshold of one. The player who has best mastered the dangers of outer space after three rounds of the drafting game and collected the most valuable items in the process wins the game of Black Hole Buccaneers.

Black Hole Buccaneers is a fast-playing drafting game that not only offers new situations and a lot of interaction with other players, but also one or two difficult decisions due to the most varied card effects. In each round, everyone at the table plays one card and passes the remaining cards to their neighbour. Whoever manages to escape the black hole in the scoring phase of a round gets to score the collected items and thus comes a little closer to overall victory.

Attention! Not suitable for children under 36 months.
