## Product Description

Different communities with unique characteristics populate this world with different landscapes and construct their buildings and cities there in competition. In each game, new combinations of communities, their home landscapes and acquirable skills are formed. So no two games are the same. Proximity to other communities limits your expansion, but gives you advantages in the game. This tension is a big part of the appeal of the Terra Mystica series. Age of Innovation offers a modular structure of the communities as well as a variable distribution of the game components for even more variety. Acquire books and use them to create inventions. Includes a two-sided game board for different numbers of players and a dedicated solo mode.
