### Product Description

Is the structure of braces more complex than that of an aliphorn? And how does a rocking horse move compared to a windscreen wiper? The Same Game is a cooperative game in which you discuss the categories in which completely different objects might have something in common. But be careful! There's a trap lurking behind every category. Give the right tips, avoid the trap and win together. Each person draws an object card and thinks of another object that only matches the object card in exactly one of the categories on display. Which category this is is determined using randomly drawn chips. The rest of the group must then decide together in which categories the two objects differ. Categories are gradually eliminated, for which the group receives points. Can you manage to master all the levels? The Same Game is a communicative and cooperative party game by Wolfgang Warsch, author of the Kennerspiel des Jahres. Caution: Not suitable for children under 36 months. - Number of players: For 3 to 6 players aged 10 and over - Playing time: 30 minutes
