Product Description

On the shores of the deep sea, long-forgotten cities from a bygone era beckon to be explored by brave seafarers. The bravest (or most foolish?) of these seafarers is the noble Admiral Luccanor, whose flagship Seeschwinge has recently returned to the port of Umbral. But it was an evil wind that carried the ship, which is now shrouded in a plague mist and haunted. Do the gamers dare to board the tainted ship and face the vile creatures of the deep?

The Admiral Luccanor's Ruin expansion adds two new chapters to the base game, Chronicles of Drunagor, with over 10 hours of gameplay. Players will be able to explore 9 new terrain maps that will put them on the Sea Wing, open two new doors and face the surprises behind them. Two new enemy types are also coming their way: Devastators and Claw Snakes can make their heroines sweat quite a bit.
