from **5,15 EUR**

Item no.: 371352
 shipping weight: 0.10 kg
 Manufacturer: Pegasus Spiele

Product Description

There are many marshy delta regions along the coasts. Some are navigable, others are labyrinths full of murky water, creepers and with only seemingly solid ground. Bottomless mud of the swamps is the latter, with the urge to spread - it likes to be everywhere, gradually turning solid ground into muddy morass. Some Dahan villages have made arrangements for mutual benefit: Easy passage and useful plants in exchange for chores more likely to be done by human hands. Most, however, set off in search of new settlements as soon as they perceive the muddy portents of his arrival. Bottomless Mud of the Swamps is an additional spirit for Spirit Island with low complexity. He wants to place his Sacred Sites in areas where building is taking place. Sometimes he needs to renew them if he has moved presences through his Permanent ability. He can stop invaders from discovering new areas by destroying villages and towns and preventing new ones from being built.

- Age: from 12 years- Number: for 1-4 players- Duration: 60-120 minutes
