### Product Description

Around 50 years ago, mankind began mining raw materials on the moon and various asteroids. For decades, this task was firmly in the hands of the world government. But unrest brought this endeavour to a standstill. Now adventurous companies and private investors want to revive the mining network and rake in the profits! In Skymines, players are savvy investors whose goal is to earn the most CryptCoin through skilful strategic action. To do this, they must invest resources in various companies to increase the number of shares they own in them and spread outposts on the moon to increase the value of each share. The latest research results can support the players, but only if they acquire research plans and fulfil the conditions on them. Skymines is a Eurogame with in-depth interaction between the players. A strictly limited number of actions per round with a wide range of options and a special card mechanism require good strategic planning in advance. With a campaign mode, a second, challenging board side and two additional modules, each game offers the opportunity to explore different synergies and strategies. Warning! Not suitable for children under 36 months. - Number of players: For 1 to 4 players aged 12 and over- Playing time: 75 to 150 minutes
