Particularly noteworthy are the movable wings, the pilot figure and the optional extendable landing legs. With this set, you can recreate the impressive technology of the Sith Infiltrator, including its effective cloaking device and powerful ion drive, in miniature form. Let the quality and innovative functions of this model kit convince you. Scope of delivery-Plastic model kit (not assembled)-illustrated, multilingual building instructions-decals-base colours (Revell Aqua Color)-adhesive (Revell Contacta Professional Mini)-brush-poster Special features-movable wings for dynamic poses-pilot figure of Darth Maul-optional, retractable landing legs-Realistic replica cloaking device-Highly detailed parts for an authentic look-Official Star Wars™ licence-Includes glue, brushes and base paints Background information The Sith Infiltrator, also known as the Scimitar, is a modified Star Courier ship specially converted for use by the Sith Lord Darth Maul. Known for its advanced cloaking device, the ship can infiltrate enemy territory undetected. The powerful ion drive enables high speeds both in space and within planetary atmospheres. This ship played a central role in Star Wars™ Episode I: The Phantom Menace, where it helped Darth Maul to carry out his missions discreetly and efficiently. With this model kit, you can recreate and experience a piece of this fascinating story for yourself.
