shipping weight: 0.40 kg
Manufacturer: COBI

Product Description

The High Mobility Artillery Rocket System (HIMARS) is a highly mobile artillery rocket system used by the armed forces of the United States, Poland and Ukraine! HIMARS is transported on a light military truck, which enables fast transport and access to hard-to-reach areas under combat conditions. The system can fire various types of rocket artillery shells, including high-explosive rockets, anti-tank missiles and precision rockets, with high effectiveness and range. The HIMARS system gained particular fame due to the extremely high effectiveness with which it was used by the Ukrainians in the current war. The licensed model made of 1:35 scale bricks complements the Bundeswehr's collection of contemporary military vehicles and aircraft. The set contains an artillery figure and printed bricks that enable the construction of a vehicle with the markings chosen by the manufacturer (Poland, USA or Ukraine). When assembled, the vehicle is 20.5 cm long. This is our next set, which relates to the war in Ukraine and contains equipment from both the Polish army and the USA.- 604 high-quality elements- manufactured in the EU by a company with over 20 years of tradition- the building blocks comply with the safety standards for children's products- fully compatible with clamp building blocks of other brands- blocks with imprints do not deform and do not fade during play or under the influence of temperature- clear and intuitive instructions based on drawings and symbols- artillery figure- model dimensions (L x H): 20.5 cm (8") x 8 cm (3.1")- Ages 8 and up
