### Product Description

Look at the Stars Every night, the sky turns into a sea of stars that can be combined to form beautiful constellations. In Look at the Stars, it is the players' task to create these constellations by skillfully drawing connecting lines. To do this, they each have their own night map in front of them, on which they draw the revealed lines in each round without touching other celestial bodies such as planets. However, the sunrise progresses inexorably and so the night sky, and therefore the area where constellations can be drawn, becomes smaller and smaller as the game progresses. At the end of the game, points are awarded for constellations with at least three lines as well as for shooting stars, planets next to constellations and completed bonus cards. Important notes Caution! Not suitable for children under 36 months.
