Product Description

With the creative box from teifoc, young and old builders can let their imagination run wild. Please note: This set does not include building instructions! Practical plastic box incl. tools The creative construction kit is supplied in a resealable plastic box. This ensures that all clay components arrive safely. The box can then be used to store other toys. A miniature bricklayer's trowel and a mortar bowl ensure realistic building. A base plate is also included. Natural & reusable materials The special mortar mixture of sand and corn extract is harmless to health. The bricks made of real clay are fired in our firing chamber at up to 1000 °C, just like the original. Thanks to the special mortar mixture, the components dissolve again when immersed in water. Our bricks can be reused indefinitely for new buildings. The mortar and individual bricks can be reordered as required. Educationally valuable: For children and adults Recommended for children aged 6 and over to develop their own creativity and train hand-eye coordination, patience and dexterity. An educationally valuable and sustainable toy. Ideal for use in Montessori education. Also ideal for adults: Relax during assembly. Switch off your thoughts for once and focus on a building project instead of a screen. This lowers blood pressure, reduces stress, promotes creativity and the ability to think logically by stimulating the networking of brain cells. - Recommended playing age: 6+ - 145 components - Incl. mortar bowl, trowel and water-soluble mortar - Trains fine motor skills, spatial thinking and creativity - Sustainable materials made in Germany
