Product Description

The cult game "Chrono Bomb!" is being published this year in a new design by Jumbo. Children aged 7 to 10 take on the role of spies. Their task is to collect objects before the bomb explodes. But that's not so easy, because the objects are well protected by laser beams. Every time the laser beams are touched, the bomb takes a few seconds off your valuable time, making the task even more difficult to fulfil. Skill, flexibility and foresight in every movement are therefore required. The laser beams can be quickly and easily tensioned in the children's room thanks to the clamps and the 10 metre long pulley. This makes it child's play to create a new course and a new challenge with every round of the game. So grab the laser beams, activate the bomb that acts as a timer and let the exciting adventure begin. - for 1+ players- from 7 years- playing time 15+ mins
