Product Description

Gone are the days when animals were put in a cage and put on display. The zoo of the future has scientifically tested enclosures and focusses on preserving species. Your task in Arche Nova is to run a successful zoo and leave the competition behind you. The days of dumping your game material in a box and looking for a needle in a haystack at random are also over. With the Feldherr Organiser, you have the game material in the box and on the gaming table under your control. Everything is neatly organised and you have the important components right at hand. This makes the game even more fun. - The organiser offers space for all the game material from the "Arche Nova" base game. - The set fits into the original base game box. - The organiser replaces the original sorting boxes supplied. These are no longer needed and must be removed. - The standard-sized cards also fit into the card trays with protective sleeves (max. outer dimensions: 94 x 67 mm). - The trays can be removed individually and placed on the playing field. - Each player receives their own tray with wooden pieces in their own colour. - The rulebook, symbol overview, glossary, game board, dressing board and zoo boards are stored on the foam cover. The solo tile is hidden at the edge of the box next to the token holders. - Transport and tilt-proof - Vertical storage possible - No assembly required. All parts are ready for immediate use. We have taken control of your board game box so that you can give the animals a dignified life in your enclosures. 11 token holders and 7 card holders ensure that you have all the game material and gameplay under control. Thanks to the clear structure of the organiser, you won't miss anything and you'll quickly notice if pieces are missing or have been sorted incorrectly. To start the game quickly, take the trays out of the box and spread them out on the table. Each player gets their own tray with the wooden markers in their own colour. The clear layout saves you time-consuming pre-sorting and speeds up tidying up after the game. This saves you a lot of time that you can invest in the game. The set consists of: - 4 plastic card holders, high, each with a compartment for zoo cards such as animal cards, sponsor cards and conservation project cards. - 3 plastic card holders, flat, each with a compartment for game cards such as final scoring cards, basic conservation project cards, double-sided action cards. - 1 plastic token holder with 5 tokens in each colour. 1 plastic token holder with 5 compartments for tokens such as partner zoos. - 4 plastic token holders, large, with 5 compartments for tokens such as special enclosures, standard enclosures, kiosks, pavilions, universities, bonus tokens, money tokens and markers such as X markers, doublers, poison markers, choke markers, pause markers. - 2 plastic token holders, each with 2 compartments for special buildings. - 4 player trays, each with 2 compartments for colour-sorted wooden rows such as counters, bandage workers and markers. - high-quality, fine-pored foam - chlorine-free and acid-free - Made in Germany. As with all 3D-printed models, minor imperfections may occur. The product images are only examples of what the finished product may look like. All products are provided unpainted. - thermoplastic - made from renewable raw materials - no assembly required - ready to play - 3D printed in Germany
